BRADSTREET'S REPORT.

Final Distribution at Retail Quickened by Warm Weather.

NEW YORK, May 24.—Bradstreet's will say tomorrow:

With the advent of warm, dry and sunshiny weather the agricultural situation has improved and final distribution at retail has been quickened, though field work by farmers has prevented much expansion in country trade. In wholesale trade and in jobbing lines there are reports of a fair activity, and where early crop prospects are promising there has been some quickening of demand.

The cotton goods industry is well employed and the slight easing of some makes of cotton does not impress the trade much because of the strength of goods generally. New business in cottons at large markets is moderate.

Business failures in the United States for the week ending May 23 were 180, against 243 last week, 236 in the like week of 1911, 200 in 1910, 201 in 1909 and 263 in 1908.

But the day witnessed practical completion of the Seaboard Afrine deal, which is only the first and smallest of the big railroad deals that will surprise Wall street from time to time in the next six months. Part of the details of the Seaboard Afrine deal became public, but the important fact that Frank J. Gould has arranged to take over control of the property and that he will associate with him the same powerful influence that went into Wabash with him was not made public.

American Tobacco rose seven points, but when it struck 250 profit-taking carried it back to 275, at which price it closed. Cigar Stores rose sharply on the curb market, reacted and rose the second time to the highest price of the market, reacted and rose the sec-time to the highest price of the

Sugar Stock Up.

Sugar Stock Up.

There has been good buying of sugar stock recently and the same reasons that have advanced Can should put up sugar. If the canning season is to break all records, the use of sugar should be beyond all records.

The big railroad deals referred to several times in this column have been held back because of the desire among leading capitalists to be sure of the crops, and sure of the political situation. They are satisfied of these things now and the Seaboard deal may be announced any day. Thus far the only thing that has been done has been the purchase by Blair & Co. of 200,000 shares of the stock from the Cumberland corporation. It is given out in Wall street that this is marely a change in the form of holding the stock. That is true so far as the deal has progressed, but it is said that Frank Gould has an option on the stock and that he is backed by the same strong interests whose entrance into the Wabash so much in public confidence. The Cumberland corporation has about \$15,000,000 of notes falling due next month. It owns 120,000 shares of the preferred. This stock was put up as collateral for these notes and the sale of the stock will furnish cash to retire them. The exact price is not given.
